

30.1 Practice - Properties of Tangents

Match the notation with the term that best describes it.

- E** 1. D **A.** Center
- G** 2. \overleftrightarrow{FH} **B.** Chord
- D** 3. \overline{CD} **C.** Diameter
- B** 4. \overline{AB} **D.** Radius
- A** 5. C **E.** Point of tangency
- C** 6. \overline{AD} **F.** Common external tangent
- H** 7. \overline{AB} **G.** Common internal tangent
- F** 8. \overline{DE} **H.** Secant

Tell how many common tangents the circles have and draw them.

12. **Softball** On a softball field, home plate is 38 feet from the pitching circle. Home plate is about 45.3 feet from a point of tangency on the circle.

- a. How far is it from home plate to a point of tangency on the other side of the pitching circle? **45.3 ft**

- b. What is the radius of the pitching circle?

about 8 ft

\overline{JK} is tangent to $\odot L$ at K and \overline{JM} is tangent to $\odot L$ at M . Find the value of x .

$x = 22$

$x = 6$

$x = 2$

In the diagram, \overline{BC} is a radius of $\odot C$. Determine whether \overline{AB} is tangent to $\odot C$. Explain your reasoning.

yes ; \overline{AB} is \perp to \overline{BC} (which is a radius) at B.

yes ; $3^2 + 4^2 = 5^2$ so $\triangle ABC$ is a right \triangle .

no ; $3^2 + 6^2 \neq 7^2$

In the diagram, \overline{AB} is tangent to $\odot C$ at point B . Find the radius r of $\odot C$.

$r = 3$

$r = 5$

$r = 8$
