

### 30.3 Practice - Properties of Chords

Find the chord length.

1.  $AB = 9$

2.  $FG = 6$

3.  $KM = 8$

Find the arc length.

4.  $m\widehat{XY} = 105^\circ$

5.  $m\widehat{TU} = 85^\circ$

6.  $m\widehat{AB} = 130^\circ$

Tell whether  $\overline{QS}$  is a diameter of the circle. If not, explain why.

7.

yes

8.

no, since  $\overline{QS}$  is  $\perp$  to  $\overline{PR}$ , if it's a diameter it has to bisect  $\overline{PR}$  (but  $19 \neq 20$ )

9.

yes

These  $\angle$ s are  $\cong$  and they have to add to  $180^\circ$ , so they each must be  $90^\circ$  making  $\overline{QS} \perp$  to  $\overline{TR}$ .

Tell whether the measures are equal.

10.  $LK$  and  $KN$

no, not based on the given info (we don't know if  $\overline{MP}$  is a diameter nor do we know if  $\overline{LK} \cong \overline{KN}$ )

11.  $m\widehat{ST}$  and  $m\widehat{RS}$

no, not enough info (we don't know if  $\overline{SU}$  is  $\perp$  to  $\overline{TR}$ )

12.  $m\widehat{BC}$  and  $m\widehat{CD}$

yes

Find the given measure.

13.  $BD = 10$

14.  $m\widehat{JK} = 55^\circ$

15.  $m\widehat{MN} = 119^\circ$

Tell whether the lengths are equal.

16.  $CD$  and  $EF$

yes

17.  $JK$  and  $LM$

no,  $9 \neq 8$

18.  $TQ$  and  $UQ$

no, because the  $88^\circ$  angle would need to be  $90^\circ$

Find the given measure.

19.  $AQ = 7$

20.  $HJ = 7$

21.  $m\widehat{TU} = 95^\circ$

Find the value of  $x$ .

22.

$x = 3$

23.

$x = 7$

24.

$x = 4$
